Design and Construction Features

□ *BCT36R-19*

 Backsplash, sides, front panel, ice compartment and bottle well are all 20 gauge type 304 stainless steel.

□ BCT48R-24

- Top panel is 18 gauge and leg channels, legs and crossbracing are 16 gauge stainless steel.
- Standard model drains have 1½" (38mm) tailpiece; post-mix cold plate model drains have ½" x 4" (13 x 100mm) NPT black pipe nipple.
- Tubing access holes are \(\%'' \times 2\%'' \) (22 x 73mm) and capacity per hole is 12 lines of ¼" I.D. x ¾" O.D. (6 x 10mm) nylon braided tubing.
- All models come with type 304 stainless steel sliding covers.
- Two-circuit post-mix cold plates available for all sizes, except where noted in charts. Eight-circuit post-mix cold plates available for 24" (610mm) long and larger models only, except where noted in charts on back page. (Add suffix "-2" or "-8".)
- Post-mix cold plate connection is ¼" (6mm) O.D. stainless steel tubing with swaged end.
- Ice bin interior depth is 10½" (267mm) in standard models and 14½" (368mm) in extra deep models complete with non-metallic breaker strip.
- Legs are 1%" (41mm) diameter type 304 stainless steel with stainless steel bullet feet.
- Crossbrace legs feature adjustable castings.

Note: Ice bin and bottle rack compartments are joined into one integral unit with separate compartments and drains. Each bottle rack compartment is fully insulated for ice-chilled storage of six or eight bottles. "Left" or "right" must be specified. Models with two bottle rack compartments store six or eight bottles on each side of the ice chest (12 or 16 bottles total). Combination ice chests are not recommended for dry, room temperature storage of bottles. Instead, higher
